DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 53-58, drawn to a method of making ESD ceramic including heating to alter the resistivity, classified in class 264, subclass 406.
- II. Claims 59-62 and 78-88, drawn to a method of making zirconia ceramic, classified in class 501, subclass 103.
- III. Claims 64-68, drawn to a method of making a ceramic including surface treating, classified in class 264, subclass 446.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions different modes of operation because the invention is directed to optimizing resistivity, while the invention of group II is directed to making a zirconia ceramic.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects because the invention of Group II relates to making zirconia while the invention of Group III relates to making a ceramic that includes surface treating.

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects because the invention of Group I optimizes resistivity while the invention of Group III is directed to surface treating.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
